#### BROCHURE/TECHNICAL SPECIFICATION:BTI RAM DOOR

### **BTI Ram Door**

#### **Guaranteed for 1500 breaches**

The **BTI Ram Breaching Door** offers realistic and affordable training for situations that involve inward opening doors. The patented Ram Breaching Door can be installed into a structure or utilized with our optional Free Standing Leg Kit.

Up to 3 lock sets can be simulated utilizing the patented system that replicates either wood or metal door/frame construction methods. Additionally, reinforced pins may be used in scenarios calling for secondary breach points (an unbreachable primary).

The BTI Ram Breaching Door is highly cost effective when compared to the use of actual doors and jury rigged systems.

**The Ram Breaching Door** comes complete with a standard 36" x 80" door and frame with provisions for mounting in existing frames, doorways or live fire houses without the use of the free-standing kit.

The **Ram Breaching Door**provides three tactical scenarios with 1 to 3 lock simulations in each:

- 1. Locked wood frame door
- 2. Locked steel frame door
- 3. Fortified door (unbreachable)

**The BTI Free-Standing Leg Kit** can be used with all BTI Doors. The optional Free-Standing Leg Kit allows the door to be placed and anchored as desired.

The door and leg kit system can easily be transported, carried and erected by two individuals in a matter of minutes. This is ideal for onsite training at locations of opportunity.

## **Reinforced Ram Door**

The Reinforced Ram Breaching Door is constructed in the same manner as the standard Ram Breaching Door. This door has been reinforced with one inch steel to replace the one-half inch used on the standard Ram Breaching Door.

The one inch steel strike plate on the Reinforced Ram Breaching Door makes this door truly "heavy-duty".

### **Reverse Ram Door**

BTI offers Reverse Opening as an option on the Ram Breaching Door. This door is manufactured and used identically as the standard Ram Door with the exception that the door opens on the left side.

# **Dual Swing Ram Door**

**The Dual Swing Ram Door** from BTI gives the operator the flexibility of breaching the door from the inside or the outside.

Special hinges allow the Dual Swing Ram Door to open both ways.
