

TECHNICAL DETAILS AND SPECIFICATIONS : IMPACT RESISTANT POLICE SHIELD

1. Height- 1000 mm. \pm 10mm.
2. Width- 570 mm (can be adjusted to 550mm) \pm 10mm.
3. Weight- 4.25 kilograms \pm 25 gms.
4. Thickness-3mm (can be increased to 5 mm) \pm 0.5mm.
5. The shield is made of high-quality, extremely resistant polycarbonate with thickness 3 mm (it can be increased upon request up to 5 mm). Inner ergonomically shaped reinforcing plate dampens efficiently impacts and vibrations on holding hand.
6. The holders should be such that it permits use by right or left hand and also supported by the other free hand as needed. V-shaped form of the shield conducts blows efficiently aside.
7. Must be double layered (centre) with pocket of air to absorb shock and trauma.
8. Handle support must be clip- open type to prevent injury to hand in case pulled out from user.
9. Anti-slip handle with indented surface should be provided. Slots for Baton must be provided on either side of the shield for left/right hand user.

10. **Accessories (Optional) - ASB-60 Protective Cover for the Impact Resistance Police Shield AS-60.** The cover protects the shield during transport and storage. It is made of high quality rubberized fabric and has a handle and Velcro seal.
